PROFILE

Undergraduate in Information Systems at the National Institute of Business Management with a strong foundation in business analysis, requirements gathering, and data-driven decision support. Experienced in translating business needs into actionable insights using **SQL, Power BI, and statistical analysis** across academic and personal projects. Skilled in **stakeholder communication, process analysis, requirements documentation, dashboard development, and KPI design** to bridge the gap between business objectives and technical solutions. Background in Agile practices, SDLC, and user story writing supports effective collaboration with cross-functional and technical teams. Seeking a **Business Analyst Internship** to support business performance tracking, process improvement, and data-informed strategic decision-making.

CORE COMPETENCIES

Requirements Gathering & Documentation • Stakeholder Communication • Business Process Analysis & Improvement • KPI & Performance Metrics Design • Data-Driven Decision Support • Agile / SDLC Practices • Dashboard & Reporting Development • Cross-Functional Collaboration

EDUCATION

National Institute of Business Management

BSc (Hons) in Information Technology for Business (Third Year)

Apr 2026 – Ongoing

- **Coverage:** Project Management, Business Analysis, Current Technologies, Data Science, etc

Higher Diploma in Information Systems

Apr 2025 – Mar 2026

- **Relevant coursework:** Data Analysis, Statistics, Power BI & Data Visualization, Data Warehouse & Data Lakes, Data Pipelines using Apache NiFi, Database Management using Oracle (PL/SQL, SQL, MySQL) foundation for evidence-based business analysis and reporting.
- GPA: 3.91

Diploma in Software Engineering

Mar 2023 – Nov 2024

- **Relevant coursework:** Software Development Life Cycle (SDLC), User Story Writing & Agile Practices, Data Modeling (ER/EER Diagram), Website Application Development, Database Systems & SQL directly applicable to requirements elicitation and solution design.
- GPA: 3.65

Certificate Course in Software Engineering

Oct 2022 – Feb 2023

- **Coverage:** C# Programming, GUI Applications, Database Management Systems, and Software Development Life Cycle (SDLC).

Ananda Balika Vidyalyaya

Jan 2020 – Nov 2022

- Successfully completed G.C.E. Ordinary Level examinations with a focus on ICT, Commerce, and English Literature.

BUSINESS ANALYSIS & DATA PROJECTS

Business Intelligence & Requirements-Driven Dashboards

- Gathered and analyzed business requirements to design interactive dashboards in Microsoft Power BI, integrating multiple data sources (CSV, JSON, SQL) into unified reporting views for stakeholders.
- **Financial Performance Dashboard:** Worked with financial data to define KPIs and build trend-analysis reports supporting budgeting and financial decision-making; identified revenue fluctuations and cost patterns to inform planning recommendations.
- **Supermarket Retail Analytics Dashboard:** Analyzed sales performance, product category trends, and branch-level results to support retail strategy discussions; findings highlighted top-performing categories and branches to guide sales and inventory decisions.

- **Train Operations Dashboard:** Assessed operational data (on-time performance, average delays, occupancy) to surface process bottlenecks and support transport operations improvement recommendations.

Analytical & Predictive Insights Projects (Python)

- **Telecom Customer Churn Analysis:** Investigated customer behavior data to identify churn drivers and support retention strategy recommendations; found that lower usage and shorter tenure correlated with higher churn risk. Tools: Pandas, Scikit-learn, Matplotlib.
- **Customer Segmentation (K-Means Clustering):** Segmented customers by purchasing behavior to inform targeted marketing strategy, identifying high-value and frequent-buyer groups for business stakeholders. Tools: Pandas, Scikit-learn.
- **Marketing Campaign Effectiveness Analysis:** Ran A/B testing analysis to evaluate campaign performance against conversion rate, ROI, and engagement metrics, providing recommendations on which campaign variations to scale. Tools: Pandas, NumPy, Statistical Analysis.
- **Sales Forecasting Model:** Built time-series and regression-based forecasts to support demand planning and inventory decisions, identifying seasonal trends relevant to business planning cycles. Tools: Pandas, Statsmodels, Time Series Analysis.

SKILLS

- **Business Analysis:** Requirements Gathering & Documentation, Business Process Mapping, Stakeholder Engagement, User Story Writing, Agile/SDLC Practices, KPI & Performance Metrics Design, Data Interpretation & Reporting
- **Data & Reporting Tools:** Microsoft Power BI, Excel (Advanced Analytics), Jasper Reports, Crystal Reports, Dashboard Development, MySQL, SQL Server, Oracle Database, Draw.io, Figma
- **Technical Skills:** Python, SQL, PL/SQL, Pandas, NumPy, Scikit-learn, Statsmodels, Data Cleaning & Preparation, Exploratory Data Analysis, Feature Engineering, Hypothesis Testing, Predictive Modeling, A/B Testing
- **Professional Skills:** Data-Driven Decision Making, Analytical Problem Solving, Business Insights Generation, Stakeholder Communication, Research & Analytical Thinking, Cross-Functional Collaboration

REFEREES

S.A.D.C.H. Jayaweera

Lecturer / Consultant, National Institute of Business Management, Colombo 07
hansi@nibm.lk

Amila De Silva

Lecturer / Course Director, National Institute of Business Management, Colombo 07
amilau@nibm.lk
